Objective

A diligent software developer seeking a role as a Fullstack Developer. Having a Bachelor in Computer Science and an Ontario Certificate in Blockchain Development, I am proficient in developing decentralized applications.

Highlights of Qualifications

- Have a solid knowledge of developing and maintaining websites.
- Able to build full-stack web applications, and decentralized web applications.
- Capable of quickly adapting cutting-edge technology in order to enhance work efficiency.
- Work collaboratively in diverse teams with effective communication skills.
- Handle different levels of tasks effectively under pressure to meet deadlines on time.

Technical Skills

Front End: ReactJS, NextJS, SASS, Typescript.

Back End: NodeJS, ExpressJS, Typeorm, Redis.

Database: PostgreSQL, Firebase, MongoDB.

BlockChain: Solidity, Web3, Hardhat, Subgraph.

Amazon Webservices: Amplify, App Runner.

Operating System: Linux, Window, MacOS.

Version Control: Git.

Graphic Editors: Photoshop, Gimp.

Education

George Brown College

Toronto, Canada

BlockChain Development. GPA: 3.93/4

09/2019 - 01/2021

HCM Bach Khoa University

Ho Chi Minh, Vietnam

Computer Science. GPA: 7.4/10

09/2013 - 08/2018

Experience

OptyFi

Toronto, Canada

Fullstack Blockchain Developer

02/2021 - Present

- Developed and maintained company's decentralized application using ReactJS.
- Created a landing website for company.
- Set up domains and AWS Amplify for product deployment.
- Developed smart contracts, wrote unit/integration test cases, and wrote development scripts.
- Created subgraphs for company's smart contracts.
- Set up CI/CD github actions.
- Worked with PostgreSQL, Typeorm for data management
- Built APIs with ExpressJS

George Brown College

Toronto, Canada

Student Researcher

06/2020 - 01/2021

- Designed and implemented a Blockchain network.
- Implemented both server and client sides using Golang and BadgerDB.
- Wrote test scripts for specific functions based on test plans.
- Built a project's application using ReactJS.

IMT Company

Ho Chi Minh, Vietnam

Java Developer

05/2018 - 08/2018

- Worked with Java Spring Hibernate Framework.
- Responsible for maintaining DMS (Data Management System) websites.
- Wrote scripts to query database in MySQL.
- Wrote functions that allow users to export summary excel files following customers' demands.
- Fixed bugs in both Front-end and Back-end.
