OBJECTIVE

As an experienced software developer with expertise in coding websites, I am actively seeking a full-stack developer position to leverage my skills for the success of the organization.

EXPERIENCE

Fullstack Blockchain Developer   Toronto, Canada

Capital Methods   02/2021 - 09/2023

- Developed next-generation yield aggregator (decentralized finance system) on Ethereum
- Built and tested smart contracts and wrote development scripts using Solidity and Hardhat.
- Developed and maintained the company's decentralized application using ReactJS.
- Developed an API server with the Backend team using Nodejs, ExpressJS, Typeorm, and PostgreSQL.
- Deployed and maintained Frontend and Backend servers using AWS (Amplify, App Runner).
- Wrote and deployed Subgraph server to track smart contracts activities.

Fullstack Blockchain Developer   Toronto, Canada

Gaia Labs   10/2022 - 08/2023

- Developed web3 marketplace for NFTs.
- Customized current smart contracts based on requirements.
- Worked on smart contracts' unit tests to ensure 100% coverage.
- Wrote deployment scripts and deployed smart contracts to testnet.
- Worked on remediating the smart contracts audit.
- Built the decentralized application using ReactJS. Maintained API servers and tracking smart contract events servers using NodeJS, ExpressJS, MongoDB, and PostgreSQL.

Student Researcher   Toronto, Canada

George Brown College   06/2020 - 01/2021

- Designed and implemented a Blockchain network.
- Implemented both server and client sides using Golang and BadgerDB.
- Built a project's application using ReactJS.

EDUCATION

Certificate of BlockChain Development   Toronto, Canada

George Brown College   09/2019 - 01/2021

Bachelor of Computer Science   Ho Chi Minh, Vietnam

HCM University of Technology   09/2013 - 08/2018

TECH STACK

ReactJS   NodeJS   Blockchain   Solidity   Web3   SCSS   Git   ExpressJS   PostgreSQL   AWS
